Sabrina, Zuraidah Aprilia 2022. *Kepatuhan Penerapan Protokol Kesehatan 5M Sebagai Upaya Pencegahan Penyebaran Covid-19 di RW 02 Dusun. Bendo Desa. Karangpandan Kec. Pakisaji Kab. Malang.* Karya Tulis Ilmiah Akademi Farmasi Putra Indonesia Malang

Pembimbing : apt. Noor Annisa Susanto, S.Farm.,MMRS

Kata kunci : Covid-19 , Kepatuhan Protokol Kesehatan, 5M .

Penyakit coronavirus 2019 (COVID-19) telah menyebabkan krisis kesehatan global yang berdampak besar pada cara pandang orang memahami dunia dan kehidupan sehari-hari. Langkah-langkah untuk pencegahan juga telah dilakukan oleh pemerintah untuk mengatasi kasus penyebaran COVID-19 seperti mematuhi protokol kesehatan 5 M yaitu memakai masker, menjaga jarak, mencuci tangan, menghindari kerumunan dan mengurangi mobilitas (Kemenkes RI, 2021). Tujuan dilakukannya penelitian ini adalah untuk menilai tingkat kepatuhan masyarakat RW 02 Dusun Bendo Desa Karangpandan dalam mematuhi protokol kesehatan. Penelitian ini menggunakan metode kuantitatif yaitu penelitian yang menggambarkan tingkat kepatuhan terhadap protokol kesehatan yang di analisis dengan menggunakan kuesioner. Populasi pada penelitian ini adalah masyarakat RW 02 dan sampel penelitian sebanyak 100 orang. Hasil penelitian tentang tingkat kepatuhan terhadap protokol kesehatan memiliki persentase yaitu memakai masker 85% artinya sangat patuh, mencuci tangan 73,8% artinya patuh, menjaga jarak 85% yang artinya sangat patuh, menjauhi kerumunan 76,3% artinya patuh dan mengurangi mobilitas 25% yang artinya kurang patuh. Hasil data dapat disimpulkan bahwa tingkat kepatuhan masyarakat RW 02 rata-rata tergolong patuh dengan persentase 69%.

ABSTRACT

Sabrina, Zuraidah Aprilia 2022. *Compliance with the Implementation of the 5M Health Protocol as an Effort to Prevent the Spread of Covid-19 in RW 02 Bendo Hamlet, Karangpandan Village, Pakisaji District, Malang Regency.* Scientific Writing of the Indonesian Pharmacy Academy Malang

Supervisor : apt. Noor Annisa Susanto, S.Farm.,MMRS

Keywords: Covid-19, Health Protocol Compliance, 5M.

The coronavirus disease 2019 (COVID-19) has caused a global health crisis that has had a major impact on the way people perceive the world and everyday life. Steps for prevention have also been taken by the government to overcome cases of the spread of COVID-19 such as socializing the 5M health protocol, namely the application of wearing masks, maintaining distance, washing hands, avoiding crowds and reducing mobility (Kemenkes RI, 2021). The purpose of this study was to assess the level of compliance of the community of RW 02 Bendo Hamlet, Karangpandan Village in complying with health protocols. This research uses quantitative methods, namely research that describes the level of compliance with health protocols that are analyzed using questionnaires. The population in this study was RW 02 community and the study sample was 100 people. The results of the study on the level of compliance with health protocols have a percentage, namely wearing a mask 85% meaning very obedient, washing hands 73.8% means obeying, keeping a distance of 85% which means very obedient, staying away from crowds 76.3% means being obedient and reducing mobility by 25% which means less obedient. The results of the data can be concluded that the compliance level of the RW 02 community is on average classified as compliant with a percentage of 69%.
